

Add another layer of fire safety

Nationwide is pleased to introduce you to E Fire USA which offers an innovative added layer of protection in fire mitigation known as the E Fire Ball (EFB). These self-activating devices can be mounted or thrown¹ and upon contact with flame will disperse an ABC dry chemical to suppress a fire. E Fire Balls are well-suited for agricultural operations, helping to suppress fires in buildings and equipment like combines, tractors, and other machinery used in the field.

The E Fire USA difference

E Fire Balls are:

- Light and portable—2.86 lbs
- Rapid activation—3-5 seconds
- Life span—7-10 years
- Ecological—non-toxic, environmentally friendly
- Autonomous—24/7 fire prevention
- Learn more at EFireUSA.com

Nationwide helps you save

Nationwide has partnered with E Fire USA to deliver savings to our customers on their E Fire Balls.

As a Nationwide customer you receive a 20% discount at EFireUSA.com
